**FINGENIOUS**

Your gateway to  
biospecimens and health data

# FINBB's strategic focus in 2019

- + Serving FinnGen pharma partners
- + Data infrastructure co-creation
- + Access to biobank samples and data

# Serving FinnGen pharma partners

- + Add-on project feasibility enquiries from global R&D teams
- + Biobank and registry study enquiries from Finnish affiliates
- + Listening to the needs of global R&D Teams - survey
  - understand why biobank studies are conducted
  - what is a successful biobank study
  - how national level biobank services could be improved
- + Listening to the needs of local affiliates - survey
  - Results overview planned in June

# Add-on study definition

- Phenotype data in FinnGen
  - ICD10 codes and procedure codes
  - Cause of death
  - Medication reimbursement data, medication purchases (date and product)
  - Cancer register data
  - Vision impairment register
  - Biobanks provide with the sample
    - Age
    - Gender
    - (Weight and height)
    - (Smoking)
- Add-on study
  - Laboratory values, hospital treatment periods, drugs administered at hospital, radiology statements and images, pathology data
  - Data can be obtained through biobanks
  - Require separate contracts, protocols and approvals
  - FINBB facilitates, coordinates, manages, contracts

# Access to samples and data

**Save time and effort and tackle bureaucracy**
